

# Lab12 Part 2

Dr. Amine Abbad-Andaloussi

Computer screen

IntelliJ IDE

Eye-tracker

Producer

Stream gaze events  
coming from the  
eye-tracker

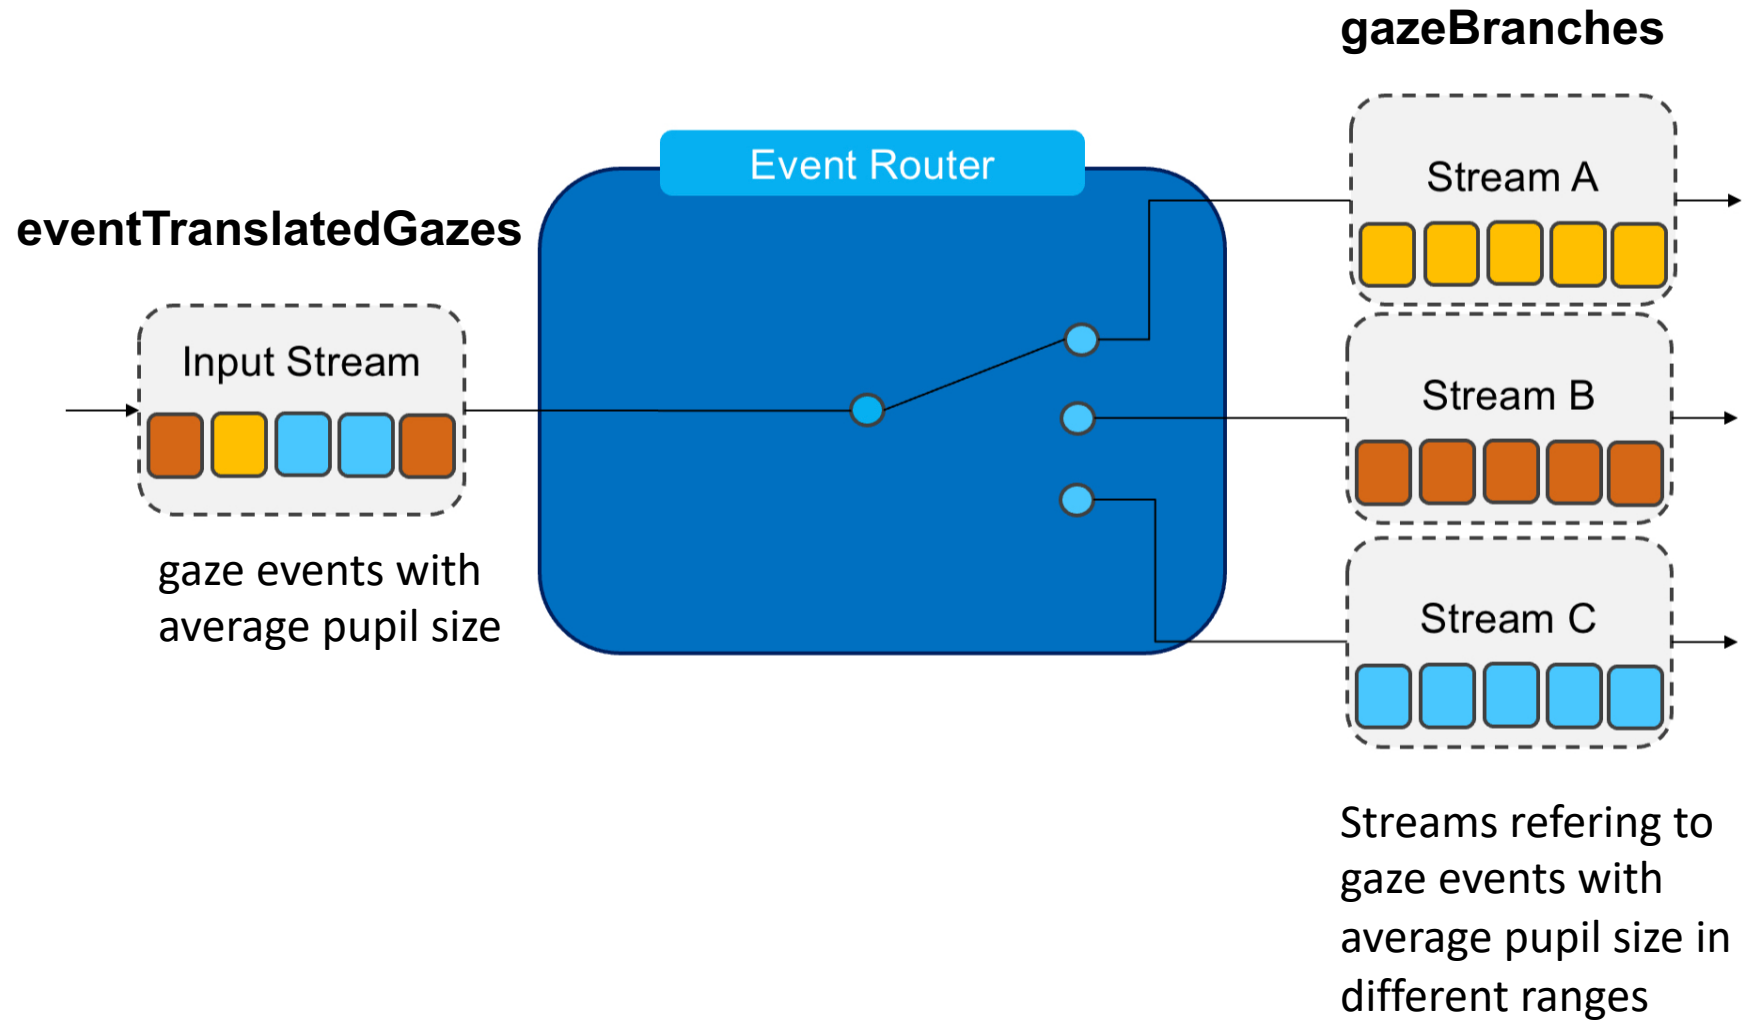

Developer

- Compute xpos and ypos from the left and right positions of gazes
- Compute average pupil size from the left and right pupil sizes
- Map the gaze x and y coordinates to the corresponding area of interest (AOI)

- Route the gaze events based on different pupil size ranges

# Overview of the whole pipeline
